NOTES

DB9 EXTENSION
 (all line direct extension)
 This shows a 9-pin DTE-to-DCE serial cable that would result if the EIA232 standard were strictly followed. All 9 pins plus shield are directly extended from DB9 Female to DB9 Male. There are no crossovers or self-connects present. Use this cable to connect modems, printers, or any device that uses a DB9 connector to a PC's serial port.

This cable may also serve as an extension cable to increase the distance between a computer and serial device. Caution: do not exceed 25 feet separation between devices without a signal booster!
